#### **Apotemnophilia: Information, Questions, Answers, and ...**

Apotemnophilia is a condition that causes those who have it to not feel "correct" in their own bodies. As a result, an intense obsession develops with removing the limb; this obsession hinders tremendously the patients' social behaviour and societal integration. These patients, in some respects resembling transgendered individuals, feel that the body part (limb) in question is simply ...

Fixed dystonia is a disabling disorder mainly affecting young women who develop fixed abnormal limb postures and pain after apparently minor peripheral injury. There is continued debate regarding its pathophysiology and management. We report 5 cases of fixed dystonia in patients who sought amputation of the affected limb.

## **Limb Amputations in Fixed Dystonia: A Form of Body ...**

Background: People suffering from Body Integrity Identity Disorder feel the intensive wish for an amputation of one limb or another kind of handicap. Due to ethic and juristic reasons, the desired surgery is difficult to realize. In spite of these problems several patients were able to achieve the wished amputation, in most cases with a cash-paid surgery in a less developed country.
