It is widely accepted that law is essential for economic growth. Prominent economists in China have repeatedly called for strengthening the legal system so that the economy can continue to grow. Nevertheless, the fact that China has been able to achieve rapid economic growth while the law is weak seems to cast doubt on the significance of law.

The Journal of Law and Economics | Vol 62, No 2

Law and economics or economic analysis of law is the application of economic theory (specifically microeconomic theory) to the analysis of law that began mostly with scholars from the Chicago school of economics. Economic concepts are used to explain the effects of laws, to assess which legal rules are economically efficient, and to predict which legal rules will be promulgated.
