Maximum Pc Guide To Building

A monster high-end gaming PC for 1440p, Ultra, and 144Hz gaming. To that end, we recommend 1440p 144Hz displays as the best overall value, potentially ultrawide if you prefer. The price of this build doesn't account for the monitor or the operating system or any peripherals. Check out our buying guides for the best mouse and keyboard for our picks in those areas.

If you're looking to build the fastest possible PC, regardless of budget, then this is the one for you. Unlike TBG's other builds , we're not even remotely interested in performance per dollar. The one and only goal here is to show you the maximum performance you get when you have an unlimited budget, and this month, the price rings in at just under \$10,000, and that's with maxing out everything!

Best \$2,500 PC Build. In my Opinion, a proper loop is the best way to combine the two; Ultimate performance, being a step below liquid nitrogen, and the fact that you have water cooling a PC. CS-PC still makes some of the best looking blocks around, and a dark red/maroon is my favorite colour, leading to the theme.
