### **Nuclear Deterrence Versus Conventional Deterrence**

by nuclear and conventional weapons actually shape the strategy of de-terrence, especially the different ways nuclear or conventional threats create credibility, or the lack thereof, in the mind of the opponent. The article will then explore how conventional or nuclear threats play out differently when employed in different deterrence strategies.

### **How Does Nuclear Deterrence Differ from Conventional ...**

The Logic of Conventional Deterrence There is comparatively little theoretical literature on conventional, as opposed to nuclear, deterrence, but what scholarship does exist provides a useful baseline for analyzing the utility of conventional deterrence in the emerging international security environment. The few scholars who have

In short, conventional deterrence doctrine, if it is to be credible, should be predicated on operational and strategic realities. It is unrealistic to expect that the United States and its partners can sufficiently punish an aggressor nation or do so in a way that does not lead to nuclear escalation.

### **The Perils of Conventional Deterrence by Punishment**

He is also concerned with examining such relatively technical issues as the impact of precision-guided munitions (PGM) on conventional deterrence and the debate over maneuver versus attrition warfare. Mearsheimer pays considerable attention to questions of military strategy and tactics.

In thinking about deterrence-based national security, Israel must regard the country's nuclear and conventional threats as seamless and interwoven. This is because a recognizably capable and coherent conventional deterrent could prevent any too-sudden escalations to nuclear dimensions of conflict, and because a similarly capable and coherent nuclear deterrent could best ensure that adversaries ...

Nuclear deterrence can also be applied to an attack by conventional forces; for example, the doctrine of massive retaliation threatened to launch US nuclear weapons in response to Soviet attacks. A successful nuclear deterrent requires that a country preserve its ability to retaliate, either by responding before its own weapons are destroyed or ...

In case of war with North Korea, the US would face a military challenge as perhaps never before in the last seventy years. This is why a conventional deterrence is actually more important than the nuclear one if we break down a realistic war scenario. The downside is that the DPRK is fully aware that [...]
